*There will be a significant variation in appearance between spray, brush or roller applied MIO coatings. This is because of the nature of MIO pigmentation and is unavoidable. MIO coatings should not be used as a finish coat where uniformity of appearance is required. These coatings are prone to marring due to the nature of the MIO pigmentation.

Surface Type	Condition	Surface Preparation	Metalshield® Coating System*	
			Primer	Topcoat
Ferrous Metals (Steel and Wrought Iron)	New or unpainted surface.	Brush abrasive blast or hand or power tool clean to remove rust and any loose, flaking or peeling paint.	Self Priming Enamel Topcoat 	
	Lightly rusted or damaged pre-painted surface.		High Build ZP Primer  Quick Dry Primer 	Premium UV Resistant Enamel Topcoat  Premium Industrial Aluminium 
Non-Ferrous Metals (Aluminium, Stainless Steel, Copper, Brass, Galvanised Iron† and Zincalume®)	New or unpainted surface.	Clean, degrease and abrade surface.	Etch Primer 	QD Enamel Topcoat™ 
	Lightly rusted or damaged pre-painted surface		All Surface Primer 	Decorama® Tintable Enamel Topcoat 
Sound Pre-Painted Surface	Clean, degrease and abrade surface.		N/A	

* Systems are recommended for mild corrosive environments. ~ Touch-up spraypaks available in selected colours.
† For touch-up and repair of Galvanised Iron use Metalshield® Cold Galv Primer.

Dulux® Protective Coatings are proud to introduce the *new and improved Dulux® Metalshield® range*, offering complete metal protection for your light industrial needs.

This comprehensive range of single component products comprises of anti-corrosive primers and primer finishes, hammer finishes, and quick dry enamel topcoats complemented with spraypaks for touch-up applications and specially formulated thinners.

Metalshield® previews the AS2700 and Colorbond® standard colours available, with specialty colours on request. Metalshield® is suitable for the refurbishment, protection and decoration of most common metal surfaces including light fabricated steelwork, earth moving equipment and industrial machinery.

Metalshield® Premium		
	UV Resistant Enamel Topcoat Industrial Aluminium	A silicone modified alkyd enamel that provides excellent weathering properties and increased productivity. Offers a metallic finish with maximum brilliance and heat reflective properties making it ideal for applications requiring temperature control.
Metalshield® Finish		
	QD Enamel Topcoat Hammer Finish	Preferred coating where a hard wearing, easy repair and recoat finish is required. Excellent for painting in and around factories and farms, tractors, trailers, machinery and safety marking. A textured coating that can be applied direct to bare metal and is ideal for covering rough or damaged surfaces.
Metalshield® Finish		
	Decorama® Tintable Enamel Topcoat	A range of solvent borne tint bases that have been formulated to utilise the Decorama® tint system. Provides good exterior durability in mild conditions when applied over suitably primed surfaces. Excellent for painting machinery equipment such as cranes, trailers and pumps.
Metalshield® Primer Finish		
	Self Priming Enamel Topcoat	Formulated to enable direct application to blast or chemically cleaned steel, providing both corrosion protection and a decorative finish in one coat.
Metalshield® Primer		
	Etch Primer All Surface Primer Cold Galv Primer High Build ZP Primer Quick Dry Primer	Preferred choice where added adhesive properties are required from a single pack primer. An anti-corrosive primer that provides superior adhesion properties, making it the preferred primer for most paint systems. Incorporates a high level of zinc, providing sacrificial protection to steel substrates with the convenience of single pack application. Protection of steel in mild industrial environments. Offers a fast turn around time and greater protection than standard shop primers. A quick dry, anti-corrosive, shop or field primer used to protect steel in mild industrial environments.
Metalshield® Spraypaks		
	QD Enamel Topcoat Hammer Finish Gutter and Fascia Touch-up Paint Steel Primer Etch Primer Cold Galv Primer	Quick drying enamel topcoat available in a range of popular Australian Standard pipe identification and safety colours. A textured coating that can be applied direct to bare metal and is ideal for covering rough or damaged surfaces. Low sheen acrylic topcoat ideal for the coating and touch-up of steel products including fascias, gutters and downpipes, fences and gates, roller doors and hot water systems. Fast drying general purpose primer for mild steel substrates. Preferred choice where added adhesive properties are required. Contains a high zinc content which provides sacrificial protection on steel. Suitable for the repair of damaged galvanised steel and wrought iron balustrades and railings.
Metalshield® Thinner		
	Spray Thinner Brush Thinner Etch Primer Thinner Cold Galv Thinner	Fast evaporating for quick flash off and drying. Slow evaporating for increased workability when brushing. Controlled evaporation rate and suitable for the application and clean up of Metalshield® Etch Primer. Specially formulated for the application and clean up of Metalshield® Gold Galv Primer.
